

## Barcode Scan & Match Solutions:

**Ensure the validity of Barcode Data anywhere in your business.**

### Simple Scanning Process:

Maintain an effective workflow process for Picking & Shipping with our portable Barcode barcode scanning system.

Simply scan two or numerous barcodes to ensure a match in order to help avoid errors and expensive non compliance fines.

### Reads 1D & 2D Barcodes:

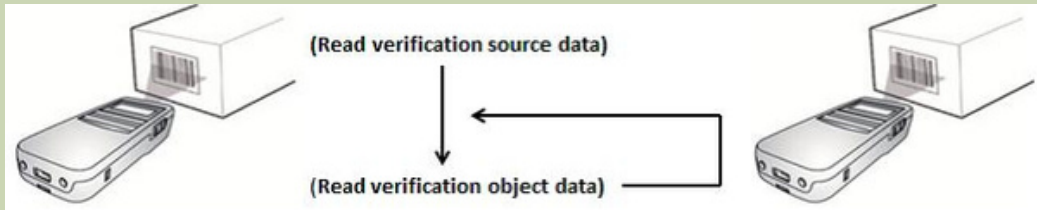

Our hardware devices read all major 1D & 2D barcode symbologies to quickly and accurately identify key data values such as Part Codes, Batch / Serial Numbers or Use by Dates.

Mismatches are highlighted with colour coded screen messages and clear audible tones.

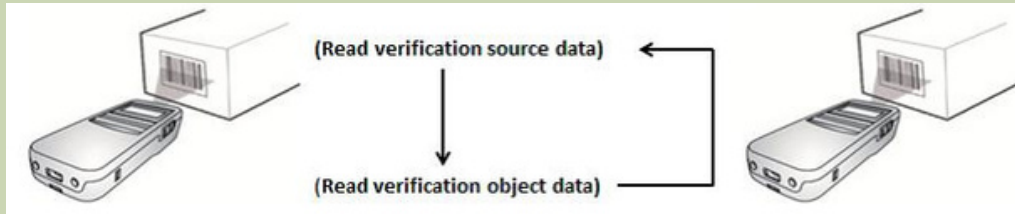

Package prices begin from just £395.00 + VAT, offering a comprehensive out-of-the-box solution that includes both hardware and software.

## 2 x Scanning Modes:

1:1 Scanning that automatically resets both scan values after the 2nd barcode scan

1:Many Scanning that compares multiple scanned values against the first 'Master' barcode

## Audit/Record Log:

Optional CSV file audit log can be created recording all pass and fail events with their corresponding date & time stamps for traceability .

## Hardware Options:

Choose from a wide range of host devices tailored to suit your environment.

Options include: Wearable devices; Portable handhelds; Tablet PC's that come with built-in barcode scanners; Or even a fixed position workstation solution complete with customised stand.

Individual hardware specifications available upon request
