

# MS85x ESD LINE

Barcode scanning for Static Sensitive Environments

## unitech ESD SAFE compliant barcode scanning line!

Introducing the new MS85x ESD (Electrostatic Discharger) series of high-performance 1D Laser and 2D Imager, USB corded and cordless (Bluetooth®). Unitech barcode scanners are specifically designed to satisfy the stringent requirements of static-safe environments such as: manufacturing (semi-conductor), gas station, fuel grounds, mining fields, clean-rooms and other situation that require electrostatic discharge control.

Featuring the latest 1D and 2D scanning technology, the MS85x ESD will provide impressive reading speeds and accuracy and can even read poorly printed or damaged barcodes. The wireless version supports Bluetooth® dual technology mode (Bluetooth® LE V4.2 and Bluetooth® 2.1+EDR, Class 1) that will deliver you freedom and business flexibility. Compatible with any smartphone, tablet, or computer, the MS852B+ ESD easily pairs to any mobile device or PC that allows the user to transmit data to the host from up to 100 meters from base.

### What is ESD

Electrostatic discharge (ESD) is a rapid discharge of electric current between two objects with different charges and different numbers of electrons. This exchange of electrons causes a large build-up of electromagnetic fields, which results in ESD. Certain electronic devices are vulnerable to low voltage ESD and can be permanently damaged by voltage currents without adequate ESD protection.

### ESD in data capturing

When selecting a barcode scanner, consideration should be made to ensure that the data capturing process does not present an additional risk in terms of ESD events. When using handheld barcode scanners, the barcode reader can build up a static charge - depending on whether it is used on a non-conductive surface. If the reader has built up charge itself and is brought close to a sensitive part, an ESD event can occur that can permanently damage sensitive goods. Protection against such damage can therefore save significant time and money in repairs or replacements. There are two types of ESD safe plastics for the barcode scanner to become ESD safe:

- External additive: When the anti-static agent has been applied to the surface of the product by brushing, spraying or dipping.
- Internally mixed: When the anti-static agent has been added to the plastic material mixed to be uniformly and evenly distributed throughout the polymer.

Unitech's MS85X ESD-safe scanner is made by via the internal antistatic agent mixture way to protect MS85X series to be ESD safe as this is far more durable than the surface simply being coated (as wear and tear over time will remove the protection).

### The Unitech MS85x ESD line:

- available in **multiple ESD versions**: 1D, 2D, wired and Bluetooth version
- durable using **antistatic agent** in the material itself (not just the surface)
- can withstand ESD up to **10<sup>5</sup> ~ 10<sup>9</sup> ohms per square**
- officially **Tested and Certified** (ESD safe for scanner body, cradle and cable)
- offers **Long life time of ESD safe protection** without wear and tear
- comes standard with **5 years warranty**
- offers the **best price** for ESD safe standards in its class

### Available models:

- The **MS851 ESD (1D wired)** Reads most standard 1D barcodes and offers longer working range, a wider scan field, high-speed rate (up to 104 scans/sec) and sensitive scanning performance.
- The **MS851B ESD (1D Bluetooth)** Reads most standard 1D barcodes, offers a high-Speed data capture performance (up to 104 scans/sec), support Bluetooth® dual-mode technology with a battery life up to 30 hours per full battery charge and range up to 100m in the line of open sight.
- The **MS852+ HD ESD (2D High Density wired)** High-performance 2D imager 1280 x 800 laser aiming pattern. It can read special barcode symbologies such as OCR, DotCodes and Digimarc barcodes. Offers excellent motion tolerance design suitable to read bar code while moving.
- The **MS852B+ HD ESD (2D High Density Bluetooth)** High-performance 2D imager 1280 x 800 megapixel laser sensor that enhances the maximum compatibility. It can read special barcode symbologies such as OCR, DotCodes and Digimarc. Support Bluetooth® dual-mode technology with a battery life up to 25 hours per full battery charge and range up to 100m in the line of open sight.
