

FS10 Fixed Industrial Scanner

Put plug-and-play high quality scanning wherever you need it

The increasing demands of international commerce and its global supply chain are pressuring companies to deliver more — and to do it faster. From manufacturing to logistics to the end customer, success is driven by the ability to quickly move and track the products that drive your business.

Now, you can address it all with the compact Zebra FS10 Fixed Industrial Scanner.¹ With a slim profile, the FS10 easily fits everywhere you need scanning. Just plug the FS10 into the USB port of a workstation, laptop, tablet or any other host device to dependably capture barcode data, from assembly to storage and fulfillment.

Zebra's FS10 Fixed Industrial Scanner sets the bar for simplicity, advanced data capture and return on investment. It all starts with Zebra Aurora™ — a powerful and intuitive software platform that makes it exceptionally easy to set up, deploy and run all Zebra Fixed Industrial Scanners, including the FS10. Once up and running, Zebra-exclusive features including ImagePerfect and PRZM Intelligent Imaging deliver first-time, every-time data capture. As your needs change, easily add support for new codes and increased scanning speed — all through the simple purchase of software licenses that future-proof your investment. Take your success to the next level with extraordinary visibility into your operational processes — with the FS10, only from Zebra.

Zebra Aurora™ Software

A single unified platform across Zebra's fixed industrial scanner and machine vision portfolio

Zebra Aurora brings a new level of simplicity to controlling enterprise-wide manufacturing and logistics automation solutions. This powerful interface makes it easy to set up, deploy and run all of Zebra's Fixed Industrial Scanners and Machine Vision Smart Cameras, while eliminating the need for different tools.

For experts and beginners

Experienced and first-time users can easily navigate the highly intuitive modern interface, reducing training and deployment time. Experienced users will appreciate easy access to all functions and streamlined processes, while first-time users are guided through all the steps in the proper order. And if users need a little help, Learn-As-You-Go offers built-in tutorials, walk-throughs and videos on all aspects of the software and its comprehensive management toolset.

The FS10 — Enable performance. Inspire potential. Experience the difference with Zebra.

For more information, visit www.zebra.com/fs10

Easy to set up

Automatic setup with Auto-Tune

Just Auto-Tune and run for consistent, reliable read rates — right out of the box. With the press of one button, Auto-Tune dials in the perfect image for faster and more accurate set up.

Up and running in seconds

The FS10 is truly plug and play. Just plug the compact FS10 into the USB port of a workstation, laptop, tablet or any other host device to flawlessly capture the barcode data required to streamline inventory management, order fulfillment and more.

Easy to deploy

Ultra-rugged and ready for industrial spaces

Rely on dependable operation in the most demanding environments with an ultra-rugged design. The aluminum housing is chemical and oil resistant and IP65-sealed.

Operator feedback/status indicators

With built-in camera status LEDs — Power, Decode and Online/Run — workers can see at a glance if a decode was successful or unsuccessful, protecting product quality and traceability — and whether cameras are operational or in need of attention. In addition, a beeper with adjustable volume provides an audible cue of a successful decode, so workers can keep their eyes on the job — instead of the device.

Added flexibility with Zebra Aurora HMI dashboard

Give workers actionable intelligence right where they need it — at their station. Operators can see and interact with the Zebra Aurora Human Machine Interface (HMI) dashboard via any web browser. The need to install a PC at every workstation is eliminated, reducing hardware requirements and installation costs.

Easy to run

First-time every-time data capture

Superior optics and Zebra's exclusive PRZM Intelligent Imaging technology work together to deliver the reliable data capture you need to keep your operations running at peak capacity. The optical system enables the simultaneous capture of multiple barcodes, extends read ranges and focal distances and allows a larger field of view to capture more information with less equipment. PRZM Intelligent Imaging is designed for the data capture demands of your environment, enabling the first-time capture of virtually any barcode in practically any condition.

Achieve high read rates with ImagePerfect

Uneven lighting and the need to read barcodes at various distances can create the need for additional cameras, external lights or complex

custom code — additions that can substantially increase the total cost of ownership. Address it all with a groundbreaking new feature — ImagePerfect. This Zebra-exclusive feature captures up to 3 different images of a single item, each with its own unique setting for focus, exposure, gain, illumination control and more. The result? High quality images that enable high read rates. A significant reduction in solution complexity. And a lower total cost of ownership.

Capture the data that drives your business

With the FS10, you can capture 1D, 2D and DPM barcodes, plus OCR human readable characters. Choose the configuration that supports the codes that drive your business processes today, knowing you can add functionality to meet the data capture needs of tomorrow. Easily add support for new barcode symbologies and increased scanning speed to meet new business needs, all with the simple purchase of a software license.

Rapid troubleshooting with Golden Image Compare

If any barcode reads fail, this Zebra-only tool allows you to quickly identify and resolve the issue by comparing any image to a golden 'perfect' image created at setup. The source of any image degradation can be immediately diagnosed, enabling the rapid correction needed to minimize downtime — from a dirty lens or a lighting problem to misalignment of the camera.

Identify and correct setting changes with Job Compare

This unique tool compares current settings in the job and the camera to all initial settings, allowing users to revert back to the original settings with one click.

Scan all barcodes simultaneously with ManyCode

Need to read multiple barcodes on an item? With one click in Zebra Aurora, you can enable ManyCode mode to capture all barcodes simultaneously, regardless of quantity, symbology or barcode data.

Complete support service — everything's covered

Get the constant peak performance and device uptime today's businesses demand with Zebra OneCare™ Essential and Select Support Services. Unexpected disruptions and unbudgeted repair expenses are eliminated. Everything is covered — including normal wear and tear and accidental damage. You can customize your support plan with numerous options to get the service level your business needs, including next-day delivery of a replacement device, on-site support, cloud-based visibility into your contracts, repair data, tech support cases — and more.

Key Differentiators

The FS10 is loaded with class-leading features, including:

ImagePerfect

Achieve high read rates with ImagePerfect

Capture up to three different images of a single item, each with its own unique setting for focus, exposure, gain, illumination control and more.

PRZM Intelligent Imaging

First-time every-time barcode capture

Capture virtually any barcode in practically any condition — from 1D and 2D barcodes on a fast-moving conveyor belt, to DPM codes that are printed on challenging curved and reflective surfaces and more.

Software upgradeable

Add what you need, whenever you need it

Add support for new barcode symbologies, faster barcode capture and all the machine vision tools you need through simple software licensing.

Plug and play with USB

Up and running in seconds

Just plug the compact FS10 into the USB port of a workstation, laptop, tablet or any other host device to capture the flawless barcode data required to streamline inventory management, order fulfillment and more.

Specifications

Physical Characteristics	
Dimensions	1.0 in. H x 2.0 in. D x 1.7 in. W 25.4 mm H x 51.0 mm D x 43.0 mm W
Weight	4.23 oz./120.0 g
Power	4.5 to 5.5 VDC host powered
Configurable IO	(2) Two optically isolated inputs (2) Two optically isolated outputs
Color and Material	Industrial green aluminum housing
Interface Ports	(1) High-speed USB-C 2.0
User Indicators	Decode/Job Status LEDs, Power LED, Online/Run LED, Beeper (adjustable volume)
Performance Characteristics	
Image Sensor	Monochrome, 2.3 MP (1920 x 1200 pixels) CMOS Sensor with Global Shutter and 3.0 µm pixel size
Acquisition Rate	Up to 60 frames/second
Aimer	Amber LED; circular pattern
Illumination	Field replaceable modules: • (1) 660nm Red LED • (1) 2700K White LED
Imager Field of View	35° H x 26° V Nominal
User Environment	
Operating Temp.	32° F to 113° F/0° C to 45° C (10-30VDC external power supply, duty cycle- dependent) 32° F to 113° F/0° C to 40° C (PoE, duty cycle- dependent)
Storage Temp.	-40° F to 158° F/-40° C to 70° C
Environmental Sealing	IP65
Humidity	5% to 90% RH, non-condensing
Shock Resistance	EN 60068-2-27, 30 g; 11 ms; 3 shocks on each axis
Vibration Resistance	EN 60068-2-6, 14 mm @ 2 to 10 Hz, 1.5 mm @ 13 to 55 Hz; 2 g @ 70 to 500 Hz; 2 hours on each axis
Supported Symbologies ²	
1D	Base 32 (Italian Pharma), Codabar/NW7, Code 11, Code 39, Code 93, Code 128, GS1 DataBar, I 2 of 5, Korean 3 of 5, MSI Plessey, UPC/EAN, DPM
2D	Aztec, Composite Codes, DataMatrix, Dotted DataMatrix, Dotcode, Han Xin, MaxiCode, PDF417, Micro PDF417, Postal Codes, QR Code, Micro QR, TLC-39, DPM
OCR	OCR-A, OCR-B, MICR, US Currency, Trainable OCR (available on select models or via an add-on OCR license)

Software		
Management	Zebra Aurora™	
Decoder Packages	1D/2D Standard (5 FPS); 1D/2D Fast and OCR (60 FPS); 1D/2D DPM Lite and OCR (5 FPS); 1D/2D DPM Full and OCR (60 FPS); Trainable OCR (standalone license) (Decoder packages vary by SKU; software Decoder Package upgrades available via an upgrade license.)
